KEY

a semi colon; indicates a separation of marking points

an oblique line / indicates alternative wording or acceptable alternative

R means reject

A means accept

AW means 'alternative wording'

underlined with a accept this word only, no alternative word is

straight line acceptable

D represents quality mark(s) awarded for diagrams, as

indicated on the Mark Scheme

L represents mark(s) awarded for labels on diagrams,

as indicated on the Mark Scheme

Q represents quality of expression and is used for marks

awarded on free-response questions

(b) decrease in response to drug/effect of drug becomes less (intense); decrease in sensitivity of receptors/more receptors are made; drug is metabolised/becomes part of body's metabolism; more drug necessary to achieve the same effect/sensation/euphoria; max 2

(c) award marks from any <u>annotated</u> diagrams
Either

inhibitor fits site other than active site/allosteric site; tertiary/3D structure or shape changes/any two bonds mentioned break; (ionic, van der Waals, hydrophobic, hydrogen, disulphide, covalent)

active site changes shape;

substrate no longer fits/binds/active site no longer complementary to substrate/E.S. complex not formed;

or

inhibitor fits <u>permanently/irreversibly</u> into active site; substrate can no longer bind/substrate blocked/no E.S. complex formed;

increasing substrate has no effect;

max 3

<u>Either</u> mark scheme as appropriate – <u>do not mix</u> marking points from both mark schemes
